Comat confirme sa présence dans le Newspace

EDITO

Dear readers,

I take advantage of this Newsletter to tell Comat's teams that I am proud of their work and cohesion, and to thank them.

We have been carrying on with our projects through the implementation of new working methods; we have kept in touch with our customers; we have taken advantage of this period to make progress on the fitting-out of our ISO7/8 rooms; and we have carried out back-office activities with unwavering efficiency.

Such a mind-set shows that we are all resilient people at COMAT's.

The space sector is strategic, and as such is favoured with the support of public authorities. The income of space industry will decrease by 22% in 2020, but our customers are sustaining their programmes without cancelling orders. COMAT is doing fine and we are resuming our activities with our equipment projects, mechanical production, support and integration activities, and the kick-off of new projects...

During this period, activities related to our products have intensified, especially as regards our reaction wheels (20, 40, 60, 90).

In Asia, activities have resumed and the flight of the PJP is scheduled in September 2020.

I extend my sympathy to those who have been badly hit during this period.

I wish you all a good return to work.

Ludovic DAUDOIS
CEO

Press release

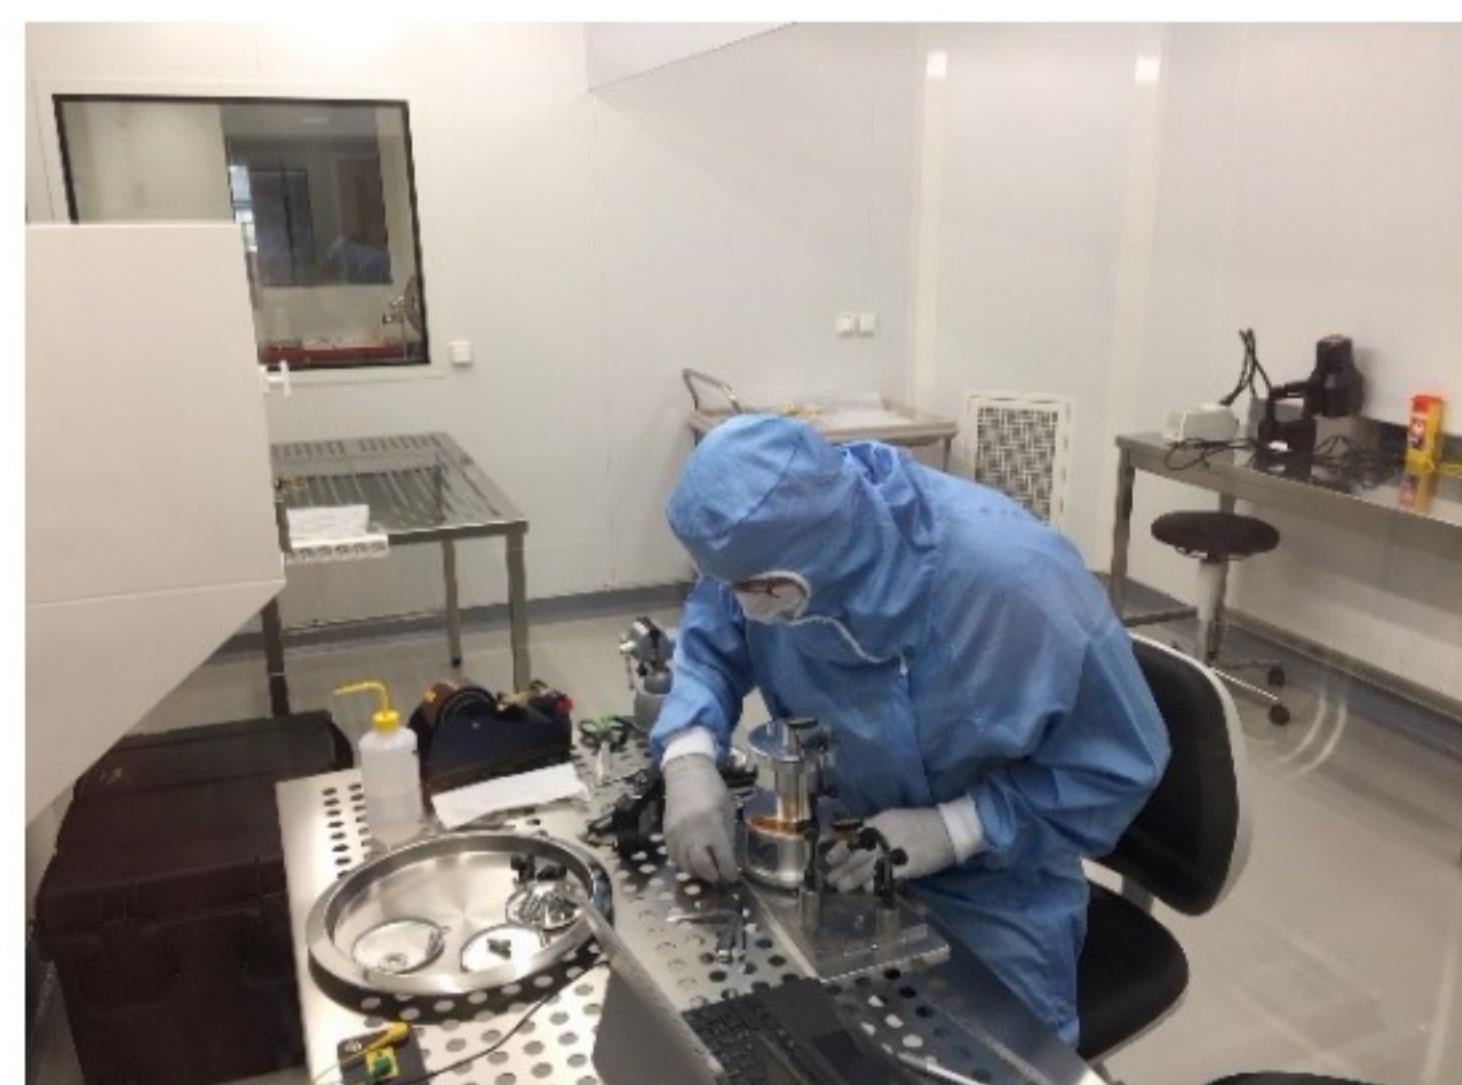

Comat gagne le marché des antennes déployables sur la constellation de Kinéis

Comat, en partenariat avec COBHAM, remporte son premier marché New Space pour la constellation Kinéis. Cette première constellation française de 25 nanosatellites est basée sur une technologie de communication inédite utilisant le système ARGOS du CNES. Universelle, simple, basse consommation, fiable, à un coût accessible à tous, cette toute nouvelle connectivité a été conçue sur mesure pour les objets connectés. Elle sera placée en orbite à partir de 2022.

Comat va concevoir, développer et assembler pour Kinéis des antennes déployables, permettant au nanosatellite d'assurer sa mission de communication IoT.

Clean rooms

Extension of our clean rooms

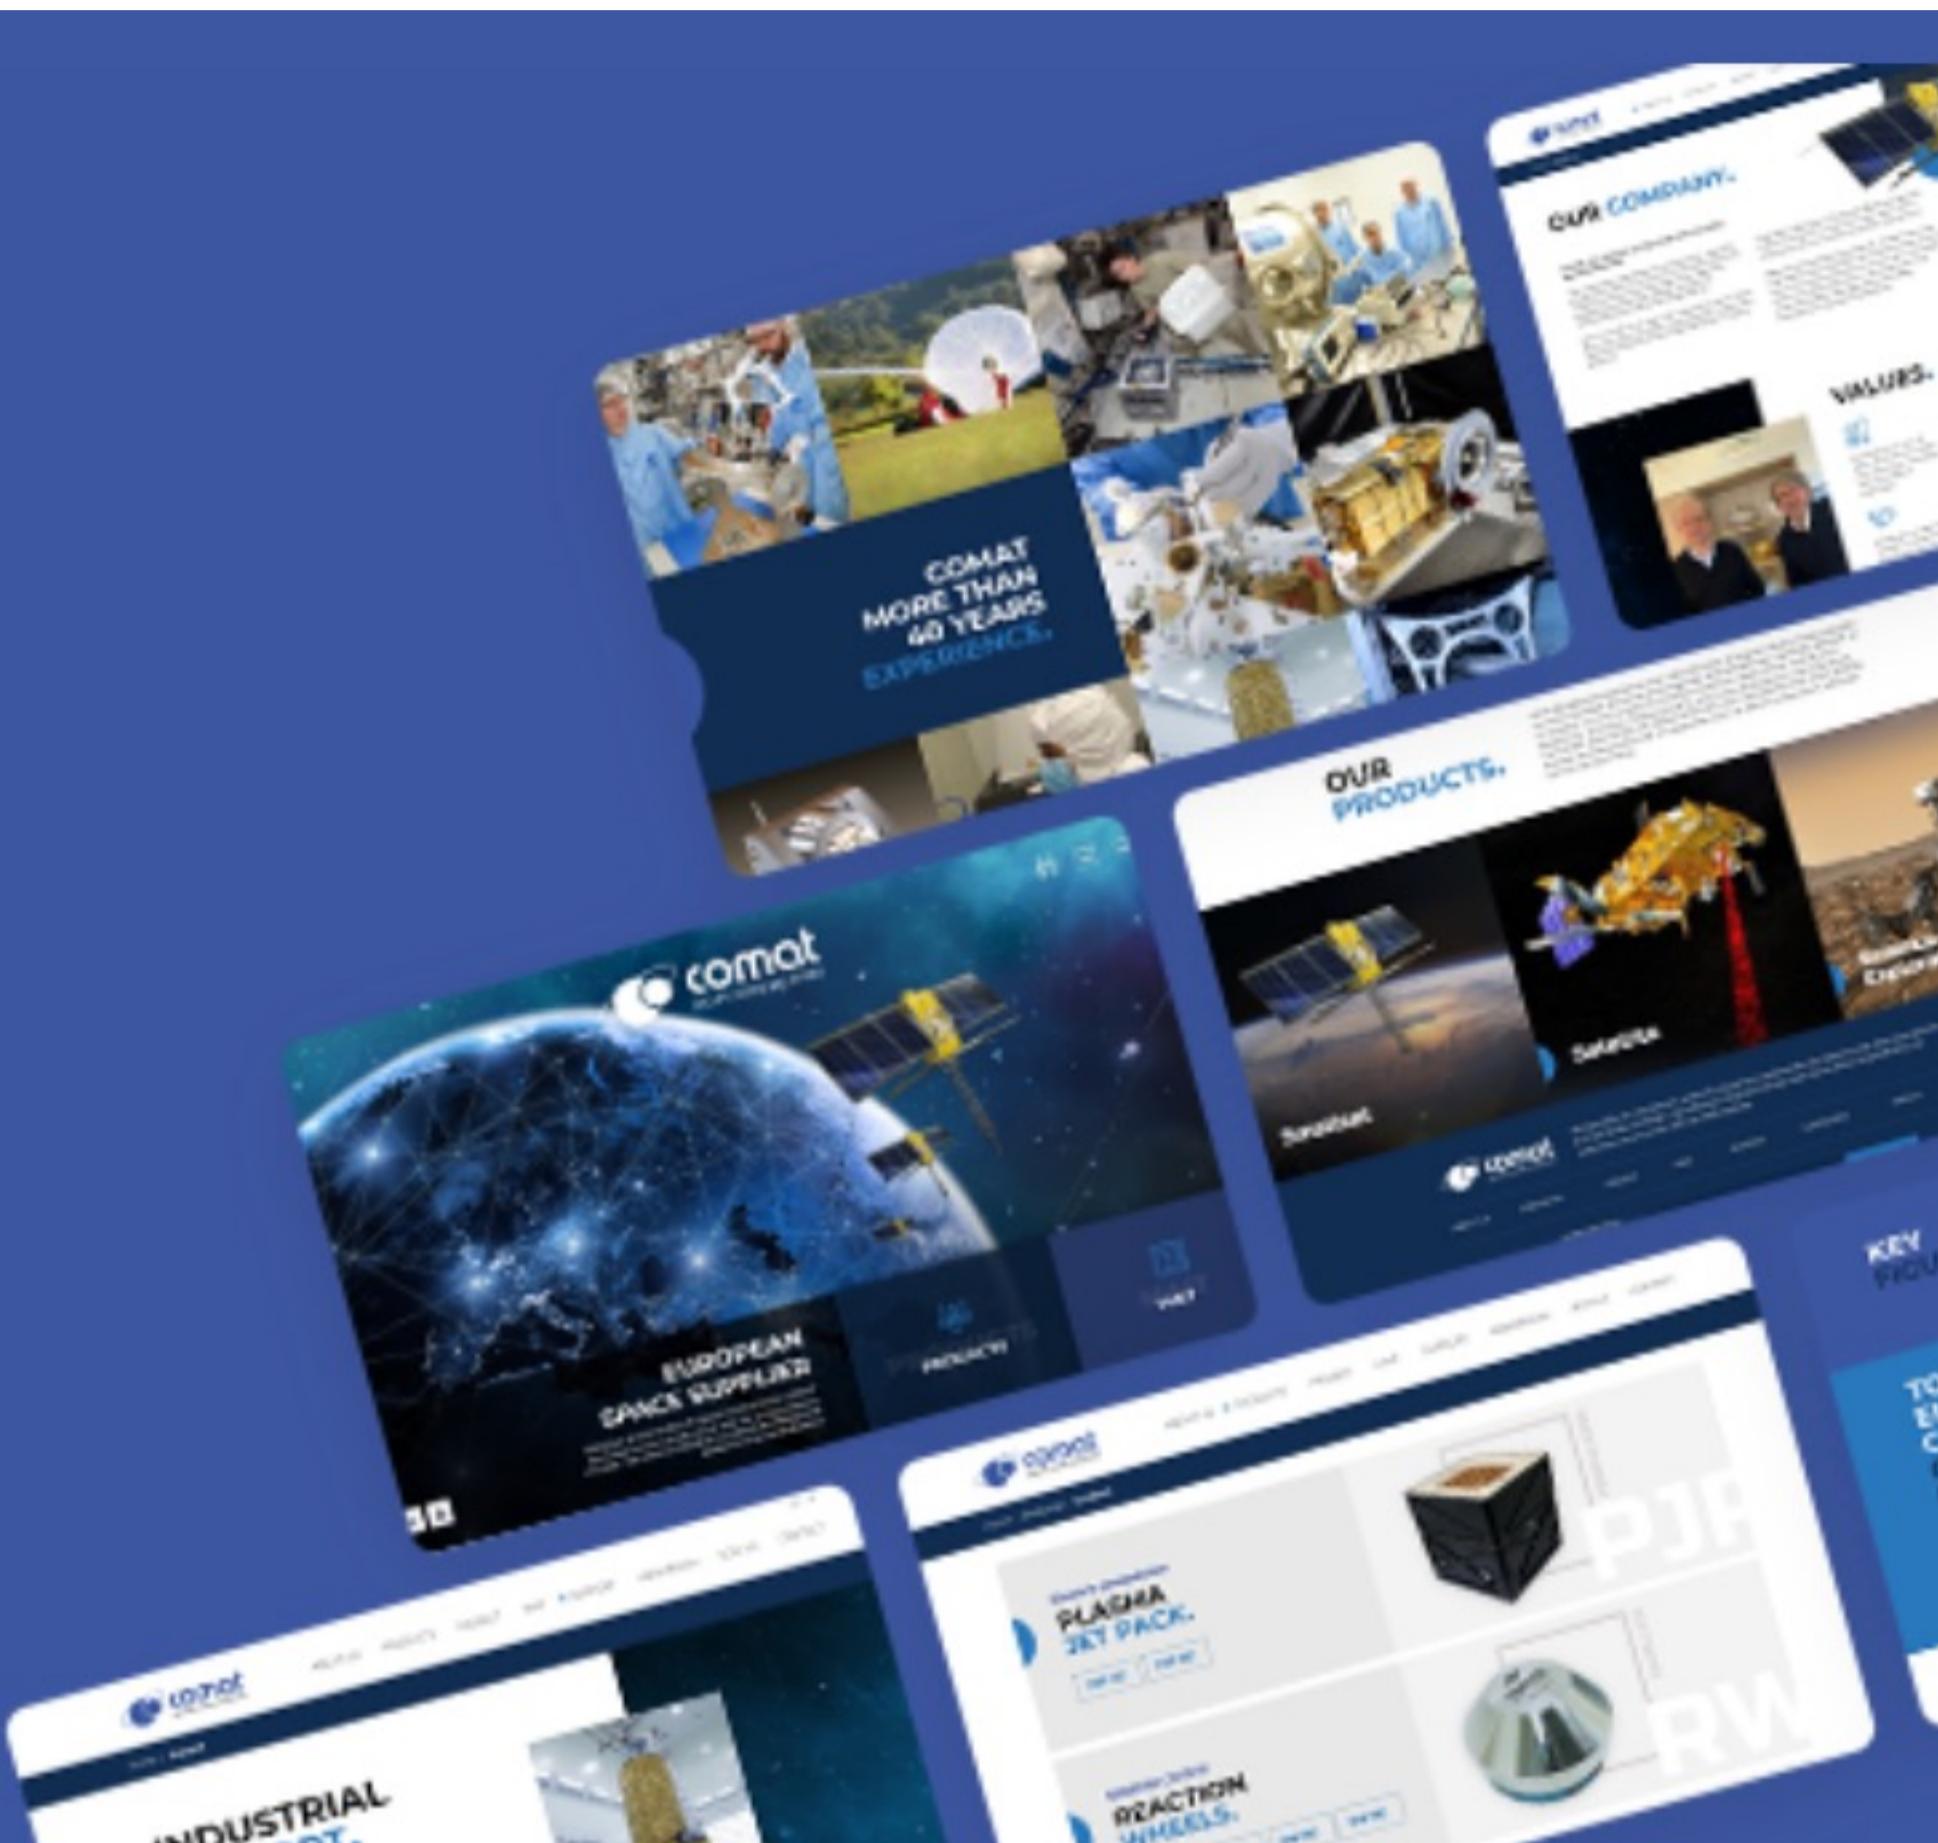

Comat is extending its clean rooms in order to better serve our customers. Two months ago, we have launched a study regarding the « cleaning » of additional 10 m² in order to meet the increasing demand for integration.

NEW

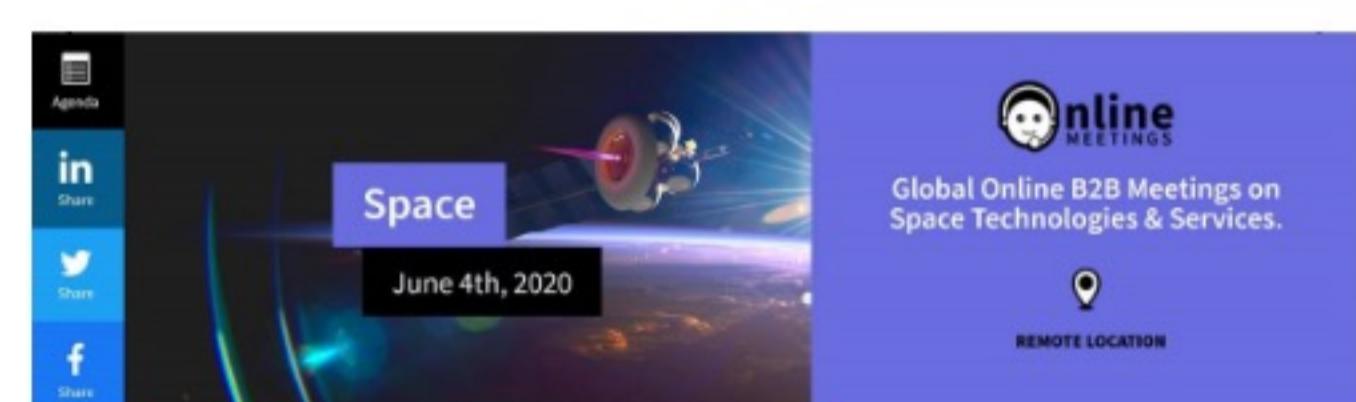

WEBSITE

Coming soon !

Venez visiter très prochainement notre nouveau site internet avec toujours plus de produits Smallsat et d'équipements.
